

Comment Number	Submitter	Page Number(s)	Line Number(s)	Comment	Theme
1	OPUC		10 261-262	NorthernGrid's work on improving WECC's Anchor Data Set is a useful result of this process. Consider a sentence or two summarizing these improvements, in addition to the offered appendix.	Technical Findings
2	OPUC		10 273	End of paragraph is missing	Edits on language
3	OPUC		12 313	Consider removing "naturally occur," or edit the sentence as the language is a bit confusing. Towards the end of this paragraph, the reader gets the impression that the system can be purposely designed such that it will cause a thermal overload (e.g., "may or may not lead to further thermal excursions").	Edits on language
4	OPUC		14 Figure 4	Unclear whether why crossed-out projects were part of the BLMP, or whether those were projects studied in addition to the BLMP.	Edits on Graphics
5	OPUC		17 387-391	The purpose of the additional two lines related to B2H is unclear - are they related to series compensation?	Needs more of the following: Explanation
6	OPUC		23 Figure 10	Graphic is upside down and backwards	Edits on Graphics
	WA		2 42	Instead of "State Commissions" It should read "State Representatives" as not all state participants were from commissions.	Edits on Language
	WA		8 201	Instead of FERC 1000, should read "FERC Order No. 1000"	Edits on Language
	WA	pages 8-9	210-216	Integrated resource planning is not driven solely by the market. It is informed by state policies, which help drive the resource needs, especially for clean energy in many states. Paragraph should reflect that public policy factors are included in IRPs, and not an afterthought.	Edits on Language
	WA		28 661-663	Given the recent focus by FERC and others on transmission planning and interregional planning, more detail and reasoning would be helpful here.	Edits on Language
			28 667	Incomplete sentence, or sentence is separated on two lines.	Edits on Language
